Krypton Level 1 - Level 2

The password is stored on a file called krypton2. Lets cat this and see what it contains.

```
krypton1@bandit:/krypton/krypton1$ cat krypton2
YRIRY GJB CNFFJBEQ EBGGRA
```

We are told it uses a simple rotation, lets try and use rot13. We can use something called alias in this example. We can write the code for rot13 and store it in an alias.

```
krypton1@bandit:/krypton/krypton1$ alias rot13="tr 'A-Za-z' 'N-ZA-Mn-za-m'"
krypton1@bandit:/krypton/krypton1$ cat krypton2 | rot13
LEVEL TWO PASSWORD ROTTEN
```

The password for level 2 is ROTTEN
